

Profile Summary – Contractor 2842

I have seven years' experience in e-Learning Content Development and Project Management. I am familiar with mainstream standards of e-Learning, and have a broad understanding and detailed knowledge of content development, planning, and managing a project from inception to completion. I have a thorough understanding of Instructional Design, Customer Relations Management and corresponding technologies.

I have a good knowledge of FLASH programs and graphic design programs to develop engaging and interactive content for educational purposes along with a professional creative image. I'm good at using the following developing tools such as Flash, Dreamweaver, Cool Edit, and a series of graphic design applications including Photoshop, Illustrator, Firework. Moreover, I'm skillful in some script languages including ASP and JavaScript. Through six years of work on integrating independent courseware with our self-developed e-learning platform, I have also become acquainted with Java related architectures and technologies.

I enjoy creative work, and my technical and management skills allow me to turn my ideas into practical applications. I also enjoy working as a part of a team, and have successfully completed many projects. My logical sense is well-developed, as are also my mathematical and analytical abilities. These help me to produce well-structured solutions for my projects.
